

INNOVATIVE AND EFFICIENT

CÓDIGOROJO
EMERGENCIES WITH TELEMEDICINE

CÓDIGO ROJO

Focused on
innovating
emergency services,
we have developed
Código Rojo
(red code).

Medical emergencies outside of the hospital are
situations where support in decision making is
critical to the results of the process.

The integrated work between the medical care
team and the health institution allows a
comprehensive treatment for the patient and
creates a new way of medical practice,
which saves crucial time in situations
where life is at risk.

WITHIN REACH OF YOUR HAND

Código Rojo (Red Code) is a modern emergency and urgency coverage service that applies Telemedicine and state-of-the-art technological equipment in the whole process of urgent or emergent medical care, which allows essential time gain towards life threatening situations.

The efficiency of the service is supported by:

UNIQUE APP

A unique App for Código Rojo (Red Code) allows the activation of an immediate emergency service, sending exact parameters of geolocation and patient identification; just by pressing a button and avoiding phone calls time loss.

ELECTRONIC MEDICAL RECORDS

Completely digitalized medical records, available online in real time for the unit team, allows getting to know the patient on the way to his-her assistance.

FAST RESPONSE VEHICLES

Código Rojo (Red Code) has small vehicles suited for the current traffic in big urban cities, equipped with all necessary tools in order to solve emergencies on site.

TELEMEDICINE

Through Telemedicine, emergency medicine specialists physically present in a medical center complement out-of-hospital care for patients by the Código Rojo (Red Code) team. They interact by available technological resources, such as mobile devices (tablets, mobile phones, Nextel, others) and web-cams for patient visualization.
